JobPhoto Description: Format:.jar Java Archive File size: 1.61 Mb Supported platform: Windows XP and later Features: - Organize pictures in windows folders or capture. JPO has easy to use wizard-like interface. Search with tags or keywords or browse through files and folders using thumbnails. You can make a slide show out of your images. Drag and drop images or folders from one location to another. Export or print your images and organize pictures easily. Batch conversion using powerful converter. Res

Don't be stuck with boring background and standard 'desktop' icons for your home folder in UNIX. If you wish to "feature" you folders, you will have to search for such solutions in many sites. This one is not one of them. Every icon is customizable, from displaying a picture, to a text, to a special effect, to a draw or to a vector one. What else? Because the application is so customizable, it can "learn" your preferences. It is easy to use, not-bloated, simple to learn, and very powerful. What's new in 2.3.0? - Added support for 32bit windows - added preview mode for the large icons - new default theme (shadow under icon) The new features of the 2.3.0 version are: - large icons - camera icon (show camera) - main menu: lock the icons - icons with special effects (wallpaper, shadow) - master list - canvas to select the icons (check boxes) - shortcut to open the folders - user comments support - a lot of bugfixes THANKS! The author does not ask for any money to distribute JPO. The goal of the author is to give a free software to all users in the world.
