Open Zebra Designer Pro software and then click on the “+” button to access the software’s main interface. Enter the License Key (Product Key) supplied to you through email, and then click on the “Next” button. Provide the name for the software and then click on the “Create” button. Close the application when prompted, and then exit it. That will open the main interface of Zebra Designer Pro. Open it and click on the “File” menu. Click on the “Export” button and select the location to save the barcode file. All you need to do is open the ZIP file that you have saved on your computer, and then double-click on it to extract all the files. Close all the windows that are open, and then double-click on Zebra_Dump_PROFILES.reg to run it. Use the default settings, and then click on the “Close” button. Replace the old bars with the new ones that have been designed by using Zebra Designer Pro. With the help of Zebra Designer Pro Setup, you can print, transfer, and print barcode labels. Association of the G1218A/C polymorphism of the DPP-4 gene with type 2 diabetes in the Greek population: a meta-analysis. The polymorphism G1218A/C (rs7910623) of the dipeptidyl peptidase-4 (DPP-4) gene has been associated with type 2 diabetes (T2D) in a number of studies, but the results are not consistent. The aim of this meta-analysis was to assess whether the G1218A/C polymorphism of the DPP-4 gene is associated with T2D in the Greek population. PubMed, Embase, and Cochrane Library were searched for eligible studies. The pooled odds ratios (ORs) with 95% confidence interval (CI) were calculated using RevMan 5.3 software. Fifteen studies were included in this meta-analysis (n = 4745). The allele and genotype frequencies of the G1218A/C polymorphism did not differ significantly between patients and control subjects in the total population (OR = 1.24, 95% CI = 0.93-1.66 and OR = 1.15, 82138339de
