Field of the Invention The invention relates to an electrical connector, and more particularly, to an electrical connector with a detecting mechanism. 2. Description of the Prior Art U.S. Pat. No. 8,320,528 issued on Nov. 27, 2012 discloses an electrical connector with a detecting mechanism. The electrical connector comprises an insulating housing and a plurality of terminals. The insulating housing comprises an upper surface, a sidewall, a bottom surface and a soldering surface opposite to the bottom surface. The soldering surface is formed between the sidewall and the bottom surface. The insulating housing further comprises a cavity defined by the sidewall, the bottom surface and the soldering surface, and a receiving cavity defined by the upper surface, the sidewall, the bottom surface and the soldering surface. Each of the terminals comprises a connecting portion, a first contacting portion extending forwardly from the connecting portion, a second contacting portion extending forwardly from the connecting portion and a third contacting portion extending forwardly from the connecting portion and extending into the receiving cavity. The housing is secured in the cavity by a molding process. The connector can be assembled with an electric apparatus

via the soldering surface, and the detecting mechanism connects an electric apparatus, for example, a personal computer to the connector. However, the connecting portion of the terminal has to be stamped out manually and the contacting portion of the terminal has to be bent manually, which is quite labor-consuming. As a result, the cost and the producing time are increased.Tejashwi Yadav, brother of Union minister Jayant Sinha, said: "I am a Jat (Jatav) but I have been victimized by NCP and Congress." More than three months after he was jailed for slapping Union minister Jayant Sinha, tea vendor Tejashwi Yadav on Friday continued to be at the
