Lands Between The Lands Between is a place where the living and the dead share the battlefield. Many ancient and powerful entities wait here and strong players are seized by their power. The conflict between the realm of life and the realm of death began long ago. To escape the conflict between these two worlds, many people established villages in the Lands Between. Time passed, the various cultures of the living and the dead were completely separated from each other, and civilization flourished. Now the humanity has spread into all kinds of worlds, and the Lands Between has long become lifeless. Unfortunately, the domain of death is covered in darkness and the ancient powers have long been at work secretly. They have produced powerful beings to wage war, to steal the powers of the living, and to enthrone

The World's Most Revered Electronic Arts Continue Trying to Destroy Gamers...

The World's Most Revered Electronic Arts continue trying to destroy the life and liberty of gamers everywhere. According to a lawsuit filed today by the Consumer's Legal Protection Bureau (CLPB) the Electronic Arts (EA) is charging $60 to download a pirated copy of NBA 2K11. EA's website for this game shows a whopping $60 price tag for a new player. Is this just an attempt to see how many people will try to scam people for money?

It's always nice to hear a balanced perspective.
