The majority of feedback that we have been asking for will be coming the in next patch, but thought we would have a round of bug testing now! Bugs that have been addressed are: 1. Monster collision should be better. (Should be able to see more monsters sometimes in inventory) 2.Items that cannot be looted sometimes now take up a portion of inventory. 3.AI has been tuned slightly. 4.Bug fix on tile and item use. Should this be present in next few patches, we will let you know. 5.First person view for monsters (When moving next to certain monsters) 6.Item-looting bug for death spell. Now working.

They're basically the Mario's New Super Mario Bros. game of the pokemon and the second game of the The Legend of Zelda series. You play as different pokemon and Link from different games and want to grow to power. They are very well designed and you really think that you're playing an RPG. The graphics are nice, but the battle system is a bit hard to use. The real problem is that you could spend a lot of time on them, so you'd better not. Otherwise I think it'd be 5 stars. If you could get enough points and raise your EXP the more you would win. The more EXP you get the higher your level would get. There are different types of class. You can have Black, White, Gray, and Blue. There is Trainer, Trainer II, and Black. You start out as an Pokémon Trainer and by level up you can choose one of those. You just have to collect EXP by using your Pokémon. But you earn EXP when you level up your Pokémon too. You can be attacked by wild Pokémon. You can catch them but not all of them. If you have those three types, your Pokémon will really evolve. You also get different items such as TMs and BMs. There is a Pokemon store where you can buy items such as items for every type. You can also buy a fast way to get to the next level in Black. There is also a special Class that you can choose that helps you earn EXP more. You can also buy different types of items. There is a menu you can use to buy those items that help you get your pokemon even faster and to increase your EXP. The things that made this game good are the personality of the game. You can interact with the player and make it that you grow your pokemon. The graphics are not bad. There is also a menu where you can turn off the items and the combat bff6bb2d33

VINTAGE

The Lands Between are in an era before order, and even the raindrops have begun to form a sky full of dark clouds. The Lofty Lords - the famous and well known heroes and characters - have lived for countless centuries to ensure an everlasting order in the Lands Between. They venture out in order to secure the security of the lands, ensuring the safety of the inhabitants and, in many cases, to uphold the balance of civilizations. The Lands Between have a precarious history as there are many taboo subjects. While it is a world full of rumors and legends, the true history of the world is entirely different from what people think.

THE WAY TRAVEL

The Lands Between are divided into twelve provinces, each with a story of its own. From this tranquil world, the Lands Between are connected by a magic river known as the Evil River. Although the Elder Wizards have many different ways to travel between the provinces, the presence of the Evil River has forever separated the provinces from each other. The Elder Wizards, however, use a half-mile-long magic rope called the "Route Connector" to cross the river, allowing them to quickly cross the river. The Wraiths have another strange method called the Vale Spelunker, through which they can travel to the destination without ever using the Route Connector. It is said to be an impossible method to travel, but they make a huge effort to master this method.
