A: The following [new] code, while it may have

worked perfectly on this website, doesn't seem to handle either the number of Answers, or the special characters embedded in that link. Note: Sorry for any syntax/formatting errors, I'm doing this in Markdown! A template, which takes the text you added to this topic as an argument (with the '%' characters in it being replaced by the match from text): .lessonsTheory_Heading_Small.lessonsTheory_Text_info_about_the_book { font-size:.75em!important; } .lessonsTheory_Heading_Small { font-size: 1em!important; } BIOLOGY Life On Earth Solutions If we need to build a way to handle this: 'Attach' a template to the HTML before each reference. Attach a unique identifier to the HTML, which will need to be matched to the correct template above. And that's the logic I went with. I hope this works for you! Templates:
