Effects of surface roughness on deposition and growth of carbon nanotubes on poly(methyl

methacrylate) film: a molecular dynamics study. The effect of surface roughness on the growth of carbon nanotubes (CNTs) on poly(methyl methacrylate) (PMMA) was studied using molecular dynamics simulations based on the classical molecular dynamics theory of carbon atoms. The simulated polymer samples with surface roughness have been prepared using the double-bridging technique. The smoothest surfaces are obtained by applying

unidirectional tensile loads to a polymer film. The growth dynamics of CNTs on different rough surfaces have been studied using the graphene diffusion model. Our study reveals the growth mechanism and suggests that the growth on smooth surfaces exhibits an exponential growth with the number of deposited monomers whereas the growth on rough surfaces shows a strong dependence on the scale of surface roughness and involves

dynamic roughening effect. The results also indicate that the growth of CNTs on roughened surfaces is growth rate dependent. The growth of CNTs on smooth and rough surfaces by varying the monomer concentration from 4×10^{-4} to 4×10^{-2} was also studied. We observed that the growth rate of CNTs is maximum at intermediate concentration of monomers for smooth and at very low concentration of monomers for rough surfaces. [IgA deficiency in

pregnant women: syndrome, clinical presentation, physiopathology and nutritional considerations]. An excess of oral infections in pregnancy has been reported in recent years, in parallel with an increase in the frequency of an association of maternal deficiencies in the IgA molecule, mostly IgA deficiency, and a greater number of infections due to the increased intestinal permeability of the maternofetal barrier and the harmful effect of

humoral factors in the microbial antigens. These maternal deficiencies involve the humoral and cellular immunity to the infectious micro-organisms. The aim of this review article is to illustrate the relationship between IgA deficiency and different types of infection in the perinatal period, with emphasis on the oral infections. The review also deals with the physiopathology of the IgA deficiency, and the potential hazards of its treatment. Finally,

suggestions for diet in the management of these women are made. Q: Integer value to character in R Can someone please assist me with the following: I have an integer value which I need to convert to a character value. The code I have so
