SystemRequirements: · Windows 95/98/Me/NT/2000/XP · 1 GHz processor or faster · 256 MB RAM or more

Overview The best way to protect your PC from viruses is to use a virus protection utility that periodically scans your hard disk for new viruses. CyberDefender is the most powerful Windows anti-virus solution for personal computers. It eliminates threats that even the most advanced anti-virus programs miss. The unique CyberDefender Internet Security Suite is a comprehensive tool that protects your PC from viruses, spyware, worms, pop-ups, adware, dialers and other Internet threats. CyberDefender was designed to run in the background without consuming system resources. It runs quietly in the Windows system tray area. You can still use the program or the Internet or PC in general as usual. CyberDefender can run in the background without consuming system resources. CyberDefender comes with intelligent protection against viruses. That's because it immediately eliminates threats when it finds them, without crashing your computer. In addition, CyberDefender is designed to ensure that your computer is constantly running in a safe and clean state. CyberDefender blocks instant messages, computer worms and trojans from entering your computer. It detects new and unknown viruses as they are created, and eliminates them before they affect your computer. CyberDefender is designed to protect your personal information and online privacy. For example, it protects you against online fraud. CyberDefender protects your PC against
