Many of the plans for the building were drawn up several years ago. Construction began in earnest about six months ago. The building's street address is 201 West Main St. in Dover. As of Friday, no classes have been moved from the fire department's original building on North Center Street. The department's telephone number, however, will change from the number on the old building, 535 N. Center St., to 521 N. Center St. After a tour of the new building this week, fire Chief Robert Fox said, "It's beautiful, it's sleek. Everything that's been thought of has been put together well." Fox said he can't really comment on the building's addition of handicapped accessibility because no such additions have been added yet. "They're going to have to do that eventually," he said. The bigger problem Fox has is the absence of a storage locker in the basement. Fox said the problem arose because the old fire department has been on the first floor since the building was constructed in 1921. That means it would take about an hour for volunteer firemen from outside Dover to access the storage locker in the basement. "We have to have that situation working before they're done," he said. Although the new Dover Fire Department building is more efficient than the old one, the cost of moving the classifications of the fire department offices to the new building is nearly \$200,000. That expense, Fox said, has not been included in the \$1.3 million dollar project. Fox said the fire department would like to have all of its offices on the second floor of the building in Dover. The matter, Fox said, "is still under discussion." As of Friday, Fox said, the fire department's fully functional

"Discover a city where the lawful and the corrupt find each other, where the price of freedom is always perilously high." Set in a world of relentless storms, savage dwarves, scorching deserts and merciless pirate fleets, "City Backdrop: Languard" is a tabletop roleplaying game of freebooters, merchants, assassins, refugees, gang-leaders, bounty-hunters and rogue adventurers, all of them struggling against the elements and the peril of the sea. Languard is a city of darkness and light, of triumph and tragedy, of folklore and hard truth. It is a filthy, forgotten backwater, a seamy, storm-tossed dockside, a city of portents and mysteries, but also a city of opportunity for those who can help themselves. For the first time ever you can now create your own City Backdrop (made by us, not a cheaply made hack-n-slash game or a digital skinner). Did you always dream of being a freebooter in Rusted Steel? Now's your chance to be one! "City Backdrop: Languard" is a brand new game made by Shadow Mask Games for Fantasy Grounds version 3.3.6 and higher. You can download the free PDF in a number of different formats with which to embed your own copy into your own gameworld. "The PDF serves as a simple and elegant document to use the city in all it's glory with all the different locations, which you can't do with a digital skinner (or not very well). The maps and all that are in the PDF version will not be translated, but you can easily plug this into a digital skinner afterwards, if you decide to do so."
