**Digital darkroom:** Photoshop has its own image editing application called the "digital darkroom." The darkroom offers similar features to those found in Photoshop, such as layers and masks. However, it is a limited tool for making adjustments to images. The darkroom is useful for making simple edits, such as correcting color or adjusting contrast or brightness. Photoshop CC 2019 also has an option called the "Make selection tool," which enables you to select regions of an image and apply a filter to it. This tool can be extremely useful for cleaning up images, but it is not for altering the underlying image.

**Typing tool:** This tool enables you to create type elements from scratch. A variety of fonts are available, including headlines, different sizes, and unique characteristics. You can edit the font's size, rotate, and move and resize the type. This tool is a good resource for typesetting.

**Crop tool:** This tool makes it easy to crop an image into any shape you want. The crop tool can be very useful for making corrections to large, vertical images so that they appear the way you want them to.

**Smudge tool:** This tool enables you to smudge or spread colors randomly across an image. This is a fantastic tool for giving the feel of a new, never-before-seen look to an image. Use it sparingly, however.

**Fill tool:** This tool enables you to fill an image with a new color.

**Gradient tool:** This tool is similar to the Paint Bucket tool in that it fills an image with a new color. However, it's much more powerful in that it also enables you to create gradients — that is, to change the color of an image gradually or smoothly.

**Lasso tool:** This tool allows you to make selections in an image. Select an area of an image, and Photoshop adds a dotted line around it. It also selects all the pixels that it touches and makes them part of your selection. This tool is a powerful selection tool that enables you to remove or copy and paste pixels and even the image itself. The tool can be a little too powerful, though; overuse leads to a quick-draw look to your photos.

**Tips for Working with Layers** When working with layers, you can create a new layer and move it to a different layer group or layer. Simply double-click the layer and then drag

Q: Filtering by multiple keywords/values in elasticsearch I'd like to filter by a certain set of keywords, or a value in a specific field. The best example that I can provide right now is where I want to select the values of multiple fields that share a common prefix in their values. Given: title | title frozen\_lake | frozen\_lake stackoverflow | stackoverflow golem\_n | golem\_n And I want to return all instances of where the title has a certain prefix, e.g. golem. On a search query, I'd want the query to look like something along the lines of 'frozen lake - 10 - golem\_n'. The query will return all three results because all three have title of 'frozen\_lake'. And my query should return no results when searching with an empty title. The end results look something like this: { "facets": { "title": { "doc\_count\_error\_upper\_bound": 0, "sum\_other\_doc\_count": 0, "buckets": [ { "key": "golem\_n", "doc\_count": 1 }, { "key": "golem", "doc\_count": 1 }, { "key": "frozen\_lake", "doc\_count": 1 } ] } } I've looked through the documentation on elasticsearch and I don't see any good ways to do this sort of query. Thanks in advance for your help! A: The following query will give you the desired result set. This

"Bild"-Zeitung hält Politiker-Exil bei 33. Februar 2011 um 12:25 Bonn/Berlin/München – Eine Woche vor der Bundestagswahl hält eine berühmte deutsche Zeitung den Politik-Exil an, und was nicht sehr angenehm ist: das Bundeskabinett kann es sich nicht mehr leisten, die Briefe abzugeben, die ihm die Ermittlungsbehörden in Bonn schreiben. Denn der „Bild“-Zeitung wird ein deutscher Straftäter länger in der Türkei geschrieben als in Deutschland. Die Zeitung will dem Verfassungsschutz darüber Aufklärung erteilen, und fordert den Kanzlerkandidaten Manuela Schwesig auf, etwas gegen das selbst zu unternehmen. Die "Bild"-Zeitung hat nach belastbarer Quelle Zugriff auf das Schreiben des Kanzleramtes und des Inlandsgeheimdienstes erhalten. Das geht aus einer Antwort der Bundesregierung auf eine Kleine Anfrage der Linken hervor, die beantragt hatte, wie es weitergeht. Die Bundesregierung wurde auf Gelegenheit auf die Frage zurückgekommen, ob es Verbindungen zwischen der türkischen Straftäterin Yvonne Zschäpe und angeblichen Mörder Olaf Messerschmidt gebe. Dazu heißt es in der Antwort: „Die Bundesregierung unterbindet sich das Abgeordnetenhaus von der Verantwortung, Dokumente der Behörden abzugeben, die in Berufung zu sehen sind.“ Die Bundesregierung wisse nicht, ob in dem Verfahren die deusc
