Void Destroyer 2: Ashes is an expanded version of VD2 (Your game), which features 3 full campaigns, extensive final level boss battles, and a fully reworked, and extended UI. With about 10 years of experience, we've come a long way in game design to create a more complete package than our previous mods. Void Destroyer 2: Ashes has been a long time in the making and we have enjoyed the journey and picked up a lot of experience along the way. We hope you enjoy this journey with us as much as we enjoyed bringing this to life for you! This is a DLC content pack, meant to compliment our previous DLC, "Repairs". In addition to our experience, we've worked closely with a couple developers - A-Z Interactive, and Milestone, to ensure that this is a truly complete, relevant, and enjoyable DLC content pack. The DLC is a stand alone game, with an option to play without VD2. VL Void Destroyer 2: Ashes is an expansion of the Void Destroyer 2 game. It expands the feature set, and allows you to play a fully customized alternate universe. This allows you to play through both Void Destroyer (VD2), or the DLC. It's your choice what you play. There are 3 full campaigns in VD2: Ashes, and the VD2 campaign is expanded with more story lines, and more VD2 unlockables/gear. We also have 3 other campaigns in VD2: ashes, which give you more freedom to do what you want to do. We have also completely reworked the campaign UI for VD2: Ashes, and also the HUD. We hope you enjoy the DLC, and return to play Void Destroyer 2: Ashes, whether you purchased the DLC, or played VD2 for free. And please...Be nice! Thanks, and Enjoy! P.S. Love the DLC? Mars is a desolate place of ash and sand that's been deserted by all but the most primal life forms. Everyone living on Mars looks like a Martian relative, so it's easy to get around. Every scrap of information comes from long-dormant memories from far back in the past.... GameplayWaking Mars 2 is a continuation of the extremely solid procedural generation strategy game Waking Mars. A game by Mark Foster that is known for providing a sandbox for the player to dig for complex systems and controls.... In typical fashion, the gameplay of XCOM: Enemy Unknown is pretty robust, allowing you to approach the game in a myriad of different ways. With only a handful of weapon classes, the game requires a mix of both attack and defense.... GameplayLambada 2 is a strategy/puzzle hybrid game with a strong focus on two things. First is the puzzle elements that come in the form of solving a Rubik's cube type puzzle. Secondly there is the strategy element of choosing a move that works best against a wide variety of different enemy types.... GameplayTwo2on flotilla is a simulator game where you'll be the pilot of a mothership. The objectives of the game are to mine asteroids in outer space, colonize them and make money from selling the resources.... In XCOM: Enemy Unknown, the game is initiated with a series of nuclear conflicts that have been fought out between the USA and the Soviet Union. One year has passed, and the U.S. has survived the two-front war to make a bold attempt to contact the people on Mars, but that's about to change.... GameplayMuscleToast takes you into the 80s as the Game Boy is still a popular handheld, and you have to make the best of this. In the game you are a training machine. You have been designed by the evil company Ninjas Inc. for the purpose of being eaten up in your workouts.... In a future not so far away, the resources on Mars are extremely valuable. These resources are mostly Solar Sails, but they also come with Uranium and Helium gas, which is hard to find. The problem is that they want to steal them from you, so you have to be prepared to defend yourself!... GameplayZombie Hunter: Survivors is a survival zombie game where you have to fend off zombies, and do your best to get some supplies, weapons and stuff to survive....

What's new in PHAT PHROG - BEE PHLAI COSTUME:

 + I honestly have never experienced one with as much detail! Its really really good that some one obviously does this for a living because it took time and patience to watch this and I don't have enough time left in the day!! This is not a rap or a music video its simply a screen shot of all 10 games running in all 10 parts of the ten battles..... and is very very detailed!!!! Not only that but Gamespot put it on their home page, I found that amazing. In fact it actually briefly spent a few days on the front page and was buried in the middle of the page when they took it down to repair some of the bugs and crashes that were caused. At one point it was at the top of the page. Incredible!!! I just don't know why they took the title away from you, like that is simply incredible!! My game crashed and I had to send in the crash report to get it back. It is possible that they removed the title so other people could have a look at that crash report and let me keep it. However now with 10 people reporting 5 crashes its back to me again. I think that the example I have posted here now makes it clear that it has more advanced functionality than the simple battle mode. In fact it could even be used to cheat, not that that would ever happen.... [color=#2c5982;]so you guys only cheat by hacking the game and/or cheating the system. Keep in mind that Scenario 1, the game is not cheating you, nor is Scenario 2, the people cheating are cheating against the game by hacking the game. Please do not try to inform them[/color] With that being said I am off to do more work on the new feature that you so lovingly inspired.... Screen shot 9 [user="Rafllow" url="
