Is there a known method to test if  $a$  is divisible by some prime  $p_i$ ? If so, does this method depend on the fact that  $a$  is a positive integer or is it more general in that sense? Thanks!

The graphics settings can be a bit tough to manage on non-high-end PCs. You will want to make sure that you have a high-quality video card and that your graphics settings are set to a reasonable setting for the game. On
