Features Football 2K4 was the first sports game to feature "defensive line pressure" where your defense can cut off running lanes, causing the opposing offense to turn the ball over. This feature was originally debuted in the 2003 Madden NFL. Goal Line Standings Football 2K4 features a notable feature called goal line standings; this feature displays how close the team to the goal line was, and whether the team scored. The top two images are the play action, and the bottom two the deep ball. Goal Line mechanics Goal Line Standings mechanics The Goal Line Standings is visual representation of the line of scrimmage. It displays whether the offense or defense is winning the line of scrimmage or not. The "touchdown line" or the "line of scrimmage" is the distance between the goal line and the line of scrimmage. This is called the "touch

The critically acclaimed VR game, Unfinished Swan, returns with a mind-bending puzzle game experience all its own. When we first encounter our protagonist, we meet a boy with a single black line down his cheek. His tail is missing. When we peer behind his back, we see that he's holding his ears. Later we see that he's wearing a long-sleeved shirt. That's it. No talking, no backstory, no context. His clothes are all-white, even the shirt is white and the line is black. But he's never in his all-white world. The girl has a tail, so does her friend. His friend's friend is white as can be. His friend's friend's friend is also white. They may be searching for his friend. They may be searching for his friend's friend's friend. They may be searching for his friend's friend's friend's friend. The more people you invite to help you with your search, the bigger the world becomes. Will you find the missing boy? This is a first-person puzzle game with room scale VR support. SYNTHSPACE is the VR lovechild of Korg's RYTM and the sublime ARP 2600. You take control of a virtual, self-sustaining modular synth rack. Your task is to create, maintain and play beats by blending sound sources. So rip up your favourite rhythm with this wildly addictive VR game on Rift, Gear VR, Vive and PSVR.THE GOOD:The heart of Synthspace is its unique look. The immersive synth room is a tangible experience for the real-world. There is a room for just one synth and everything is laid out as close as possible to the real thing.Move, stretch and articulate your modular modules to their limits. Add, delete, rearrange or mute them entirely.Easy and intuitive low-fidelity sound generation with realistic rendering.A unique world for the

imagination to play in. Use the Open-XR view controller to see your modules in VR without a Gear VR, a Gear VR and a Vive or an Oculus Rift and an HTC Vive.INTEGRATED BY/FOR:Psysh Android Device - control the device and your synth in the same appPsysh iOS Device - control the device and your synth in the same appGive your synth its own unique look by changing the color of its physical module palettes.Get professional sound by recording your sessions. Easily export your synths to your favorite DAW.LIV SUPPORT (VR recording):Every module comes with a default LIV sound. For many it will already be a good start. You have full control over the LIV sound in the module scene. All the standard parameters can be manipulated: reverb, ring-mod, low-pass filter etc. You can also add multiple LIV sounds to each module.Just you and your real self in the same app. Get an overview of all your synths from the main menu.Trial and error - start small. Pick a module, put it somewhere, and try to play it with a beat.Expand your horizons. Follow the Synthesis guideline for more info on growing your system.Look out for the #playon in our Discord channel.We are always listening. Whether its your experience or a missing function, drop us a note on Discord. What do you want to see in Synthspace?The best way to keep your VR safe and sound is to keep it charged. Use a safe, enclosed charging station or take it with you.We have worked hard to make the different parts of Syn

The album has had it's rightful share of press over the years as here's a review on the web from just a few months ago: "A curious combination of top-notch pop and club classics, SOUND '74 was made by Hamburg's EQ and the record label came out in 1974 - the same year that an English band named Pink Floyd released their dynamic landmark album, "The Dark Side of the Moon". Not that it has ever been reflected in the actual material, which aims for a feel-good mix of big blues numbers and electropop tunes that became all too rare before the start of the political glasnost era. The album features former and, true to the traditions of the early 70's DJ scene, briefly employed to the touring version of the popular Autobahn racing show, which was headlined by German superstar Klaus Dinger when he played at various German cities' universities and clubs. From Klaus' vocals to songs penned by Wiebke Kleiner,

Harald Herz and Pie Lube, the spectacular record includes a wide overview of Dinger's repertoange, spanning almost every genre imaginable. You don't have to be a connoisseur of German R&B and soulful pop to enjoy most of the tracks, although there are a good number of drivingly catchy new wave gems and some nice funk tracks. For

REUTERS/Gleb Garanich Tanks in the field have been abandoned and factories raided by both sides have been destroyed, a sign of the dangers they face in a war that has already claimed more than 10,000 lives. Government forces and the rebels have been holding regular skirmishes in the frontline districts of Donetsk since January. They have mostly restricted their fire to checkpoints, where local men from both sides face off and even exchanging shots, but they have occasionally fired artillery and dropped landmin
