Breslov Fight School is a game developed in Unity engine and published on Microsoft Windows. The game is currently in pre-release phase, and here you can experience the first episode of the story and, at the same time, try a work in progress. The game is a "beat them all" (or "be the first to finish"), typical for the manga "Yu-Gi-Oh".

The story, inspired by the manga, takes place in the world of classic cards. A group of old-school card players get together and try to develop the card game with their own modern modifications. That was the image of their youth, and that is the basis of the game. There are five difficulty levels, each with five stages. Each stage will take about 15 minutes to complete. Also, there is also a story mode, where you will have to achieve different goals in the future game, divided into 5 chapters. Features: * Five difficulty levels * Five story-modes * Customizable controls, mouse and keyboard * Card manager * In-game hints * Practice battles * Tutorial * Multiplayer * Dynamic soundtrack * User stats and achievements * Three major cities to traverse * NPCs * Over 50 cards * Over 100 combos and alternative combos * Hardcore mode

This year we celebrate a remarkable release of independent games, with a first time global launch on the newly established PlayStation Store. This game was made by a small group of experienced industry veterans, who are determined to change the way people experience games. If you have any questions about the game - please contact me via PM on the Steam forums, Facebook or Twitter. VandalDefender is a family-friendly action adventure game where you take on the role of VandalDefender, a hardened agent of the agency Defender, an elite team tasked with protecting the world from all those who have chosen to ignore the rules of society. He was sent in to check the state of the Capital Wasteland after its citizens got out of line. That's when the biggest crisis would have started, but VandalDefender would have to manage to get to his position unharmed first and get to the elevator in the right time. In this unique take on the FPS genre, you can combine

VandalDefender's abilities to affect reality to create ridiculous situations for our hero - and fellow protagonist - to overcome. PLEASE NOTE: This is a first person shooter game, as the player is in control of VandalDefender. Some stages contain timed challenges that will test your situational awareness, quick reaction time, and knowledge of the game's mechanics. This is not an episodic or a single-player only game. Enemies, like you, have awareness of the player. This means that you cannot run or hide from them all the time. In this game, the player will meet various NPCs, defined by their status and abilities. You may choose not to interact with them at all, and they will be unaffected by your actions. Permissions Required
