Dead Island: Riptide Definitive Edition. A method for determination of the activating effect of vitamin D on the calcium-phosphate parathyroid. The effect of 1 alpha, 25-dihydroxyvitamin D3 on parathyroid function is largely due to its action on calcium-phosphate metabolism. To determine the form of vitamin D required for maximal activation of parathyroid function, the activity of parathyroid function after incubation with various forms of vitamin D was studied. The following compounds were used: 1. 25-hydroxyvitamin D3, 2. 25-hydroxycholecalciferol, 3. 25-hydroxy 6d1f23a050
