Calibre 4.0 Beta Available There's a new minor release (beta) of Calibre 4.0 available. As with all software beta releases, you may notice bugs here and there, missing features and formatting issues. (The major release 1.0 is in the works at the moment.) This is not the final release, however. It's not finished, and still doesn't have the major features Calibre 1.0 promised back in 2007. It's a beta: you can help, too. If you do not want to compile Calibre yourself, the latest binary release is available for Windows and Mac. If you want to compile, you'll need GCC 4.2. You can download it at sourceforge here. If you
