
Sat2biologypracticetestpdf

You can use `--number-fields` switch (like `head` switch) to limit output to first line.
(Options) `--anything` Output: `$ wget -O - | awk -F'/' / {print $1}' | awk '!a[$1]++' sat2biologypracticetestpdf` If you want to use exactly ONE week more, it can be done in two steps: 1) Get date, output format and filename with this code: `$ wget -O - | awk -F'/' / {printf "date=%s,ofmt=%s,filename=%s ",$1,$2,$3}' | \ awk '!a[$1]++' date=2017-10-12,ofmt=%s,filename=sat2biologypracticetestpdf.sattest2.pdf` 2) Use `"date +%Y-%m-%d --date="` to create several files with this code: `$ for d in {0..63} ; do wget -O - | \ awk -F'/' / {printf "date=%s,ofmt=%s,filename=%s.%d ",$1,$2,$3,$d}' | \ awk '!a[$1]++' ; done` After that, every file will be named by the date used in step 1. For your sample, you can use something like this: `$ for d in `seq -w` ; do \ wget -O - | \ awk -F'/' /`
