April 5, 2018 - DENTIS Implant Case #16 Implant placement OneQ-SL and lateral sinus augmentation with BCP [Visit official DENTIS pages] - Website: . A 3-year-old child with a severe allergy to antibiotics, with no additional risk factors, had teeth extracted due to a sore throat. After removal, a CT scan was performed to determine the area to be removed, and removal was scheduled. The next day, the patient's parents came with a request to implant the DENTIS No16 implant and enlarge the lateral sinus with BCP. A CT scan was performed at the site of the planned operation to determine if it could be performed.
