Mar 1, 2021 - Here's a tutorial on how to make amazing night time-lapse mode on iPhone 12 and later phones to capture that cinematic night time shot. If you want to make these shots smoother, you have to put them in the Photos app and then upload them to your movie. But unlike slow motion movies, which you can load later, the night mode will appear immediately. If you click on the movie, you'll see that you can put the videos in another video player or, according to Apple, even in the Photos app. Here's how to do it. Step 1: Put the movie in the Photos app
